Subject: FW: Request review of Climate Change chapter for online course, Introduction to Air Pollution Control
Module 12 Climate Change version 10 DRAFT 20170321.doc

Marcus – I know you are very short on days in the office next week, but if you have a little time to quickly scan this...that would be great. Jim, please take this after Marcus does and review more carefully and incorporate all of comments together.

They have requested feedback no later than Friday 4/7.

Thanks, Rona

Subject: Request review of Climate Change chapter for online course, Introduction to Air Pollution Control

Hello Rona,

I am following up with you on my voicemail in which I mentioned that the Training Team at OAQPS is updating a much-viewed but older online course, "Introduction to Air Pollution Control". We will be adding a chapter on Climate Change, which staff from our Climate, International and Multimedia Group drafted (file is attached). I asked Sara Terry from our Policy, Analysis and Communications Staff for a climate change point of contact who might be able to review the chapter. She suggested you or someone in your Branch might be able to do this for us. I have also provided directions below for linking to the online course.

I would appreciate it if you would get back with me and let me know if you or one of your staff members would be able to review the draft chapter and provide us comments. If you have any questions, feel free to contact me.

Thank you

Mary Ann

Subject: Would you review my edits/comments on the Climate Change chapter?

Hello Gail and Rob,

Thank you so much for drafting, reviewing and revising the Climate Change chapter. It is really coming together. I reviewed the latest version, made some edits/comments and have attached it to this email. **Would you take a look at the document? It would be great if you could give me your feedback by Wed., March 22.** The next step will be review by OAP. Do you have a contact person you work with?

Mary Ann
